

RIJNDIJK *staalconstructies*

an ANDUS group company

RijnDijk Staalconstructies

Specialist in industrial steel constructions

RijnDijk Staalconstructies is a full service partner with all of the steel construction disciplines in house; from project management, engineering and production to on-site installation. It is this combination of lengthy experience, professionalism and in-depth knowhow that makes RijnDijk Staalconstructies a leading specialist in its field.

Using our own experienced engineers, state-of-the-art machinery and highly trained professionals help guarantee quality and reliability in project delivery.

Multidisciplinary projects

In the execution of multidisciplinary projects, RijnDijk Staalconstructies is responsible not only for the steel constructions, but also for the foundations, concrete floors, roofs, gables and windows, installation of equipment, electrical and mechanical installations.

Modular projects

Modular construction shortens the building time of process installations considerably, while improving the efficiency and safety of the project, significantly, at the same time. RijnDijk Staalconstructies produces pre-fabricated modules for a wide variety of onshore applications including industrial, gas and petrochemical sites.

Project management

Project management is an important competency of RijnDijk Staalconstructies. Tightly controlled planning implementation and transparent procedures ensure that all agreements made are met punctually, within the agreed contractual obligations. Total project overview and taking responsibility; that is what RijnDijk Staalconstructies stands for.

Engineering

With its own engineering, RijnDijk Staalconstructies has full capability for the successful realisation of design and construction projects, down to the very last detail. Whether it concerns designs based on steel or concrete and/or installations; everything is possible. Designs are critically reviewed and accompanied with advice on improving the product.

Production

On the basis of its many years of experience and knowhow RijnDijk Staalconstructies guarantees efficient production and building. The state-of-the-art machine park and the highly trained professional personnel guarantee quality, safety and delivery reliability.

On-site installation

Responsible for the realisation of national and international projects on-site. The combination of sophisticated logistic systems, the flexibly equipped production organisation and rigorous planning enables RijnDijk to realise the work on-site safely and within the agreed deadlines. Fully engaged from order to hand-over.

Quality & safety

RijnDijk Staalconstructies is nationally and internationally certified and places great value on a stringent policy. Quality and safety have the highest priority in everything we do. Our staff members are continuously trained to ensure that they can comfortably meet the requirements of our clients.

Experience at the highest level

RijnDijk Staalconstructies is a very experienced and substantial partner which operates at the top of the market. Our organisation stands for high quality and the application of innovative methods in the design, production and realisation of the projects - and ultimately optimum service provision by sound project management. Qualities that have made leading companies and organisations from around the world longstanding members of our circle of clients.

Part of a greater whole

RijnDijk Staalconstructies is part of Andus Group, an international operating holding company. The subsidiaries of Andus Group have one aim: Serving the industry. And they have one characteristic in common: to be the best within their own specialisation. On specific projects, group companies work together, combining their experience and resources.

The ambition is clear: the Andus Group companies are always aiming to achieve maximum client satisfaction. This requires high quality, experienced and skilled project management and the use of innovative methods when designing, producing and realising projects. That is why Andus Group can continue to further strengthen their possibilities at the top of the different market segments.

In short: Andus Group is a powerful and reliable partner completely geared to your success.
